

# SCOOP IT ➡ BAG IT TRASH IT

Every time.      Everywhere.

---

IT'S NOT JUST THE MESS...  
IT'S ABOUT  
CLEAN WATER AND PUBLIC HEALTH.

**PET WASTE DOESNT STAY ON  
THE GROUND...**

**IT POLLUTES OUR WATER.**

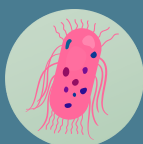

Rain washes pet waste across the ground into storm drains, carrying **bacteria** into rivers, streams, and coastal waters.

  
**GREENSCAPES**

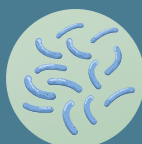

# PET WASTE CONTAINS BACTERIA...

E. coli

Salmonella

Campylobacter

## ...AND PARASITES

Giardia

Hookworms

Roundworms

Some bacteria can live **up to four years**  
in the soil.

## STORM DRAINS CARRY POLLUTION DIRECTLY TO OUR WATERWAYS.

Pet waste can **contaminate** waterways,  
**drinking water** reservoirs, **harm** wildlife,  
and even **make you sick**.

## WHAT YOU CAN DO

Scoop it → Bag it → Trash it!

Every time.

Everywhere.

GREENSCAPES
